

## PROJECT FUTURE TRANSPORT - April 2025

An opportunity to acquire the assets and IPR from early-stage development of a novel electric aircraft

### Key Highlights

- \$50m Invested to date
- 7 years of development

### Physical Assets

- Decommissioned 1200kg flying prototype & control station and equipment
- Decommissioned 1/3 scale prototype
- Various propulsion system prototypes
- Various parts and models for testing
- Trial production parts
- 2 bespoke test rigs and control equipment
- Visual models and mockups
- IT equipment for 20 people
- 3D scanner for quality control
- Sundry office and workshop furniture

### Expressions of Interest

- Interested parties will be required to sign a nondisclosure agreement (NDA) before further information is provided.
- Indicative offers accompanied with proof of funding are required by 5pm on Friday 9 May 2025.

- Completion as soon as possible thereafter

### Intellectual Property

- 1 patent granted in multiple jurisdictions
- 1 additional patent in process
- Trademarks for name and logo
- Design data (drawings etc) for prototypes and test articles
- Development stage control software developed or modified for prototypes and test rigs
- Test reports for all prototypes
- Cost analysis for prototypes and future vehicles
- Results of simulation (CFD) and stress analysis for prototypes and concepts
- Concept designs and 3D models used in design exploration
- Modelling and engineering analysis for future vehicle
- Bespoke or modified software and tools for aircraft architecture design
- Results of manufacturing process trials
- Process design and simulation outputs
- Renderings and visual assets created to support brand and websites
- Concept of Operations for future product
- Documentation of discussions with FAA
- Product development process documentation
- Sundry engineering concept documentation

### For Further Information
